EDUCATION

Shiraz University, Shiraz — *Bachelor of Science*

September 2024 - Ongoing

Electrical Engineering

Relevant coursework : Signals & Systems , Linear Algebra , Engineering Probability, Electronics, Engineering Math .

Stanford CS 224N By Cristopher Manning

MIT , Introduction to ML by Leslie Kaelbling

SKILLS

Languages : Python , Matlab

Frameworks & Libraries :

Pytorch, Tensorflow, Numpy
Pandas , Scikit-learn ,
Matplotlib, Hugging Face
Transformers

Research Areas : NLP ,RL , Deep
Learning , Computer Vision

PROJECTS

S&S finetuning — *Pytorch , transformers*

Finetuned the Qwen 2.5 - 1.5B Math-Instruct model on a small hand-curated dataset of undergrad level Signals and Systems problems teaching it to reason and use tools like Scipy to solve these types of problems

Mini-GPT — *Pytorch*

Reimplemented the GPT-2 architecture from scratch with KV caching , beam sampling and trained it on the TinyStories dataset

Img-Transformer — *Pytorch*

Reimplemented the image transformer paper using pytorch
Trained it on the CIFAR-10 dataset for image generation

Mini-Transformer — *Pytorch*

Reimplemented the Attention is all you need paper using Pytorch
trained it on the WMT-2014 German-English dataset (a subset of length 100,000 due to lack of hardware)

Character Level Language Model — *Python , Numpy*

Word2Vec & GloVe implementations - *Python , Numpy*

LANGUAGES

English, German, Farsi
